Get The Most Of Your  
Rhebo OT Security Solution

OT SECURITY DESPITE  
SKILL SHORTAGE

FAST AND EXPERT  
OT SECURITY SUPPORT

ASSURANCE AND  
PEACE OF MIND

»With Rhebo we can actively make sure that our Industrial Automation & Control System (IACS) is stable and secure. Rhebo provides the detailed visibility into our IACS to rapidly identify and mitigate novel attacks and misconfigurations that have been invisible to us in the past.«

Dipl.-Ing (TU) Sven Hanemann | IT Security Manager | e-netz Süd Hessen AG

Rhebo Managed Protection is an OT security service for companies struggling with resource constraints and skill shortage. With Rhebo Managed Protection, we support you in operating the dedicated OT security monitoring and anomaly detection solution Rhebo Industrial Protector. Our security engineers help you design, install, configure

and optimize the industrial IDS solution specifically to your needs. Our security analysts monitor alerts, evaluate severity and propose mitigation measures, on demand or as a fully managed solution, to constantly improve your OT security. With Rhebo Managed Protection, we give you peace of mind – because we monitor so you don't have to.

**Rhebo Managed Protection** provides you with

**THE CONTINUOUS ANALYSIS** of anomaly alerts by OT cybersecurity experts

**THE NOTIFICATION OF CRITICAL EVENTS** and recommendation of mitigation measures

**THE REDUCTION OF DOWNTIME** through rapid forensic analysis

**OT SECURITY IMPROVEMENT** through recurrent security assessments

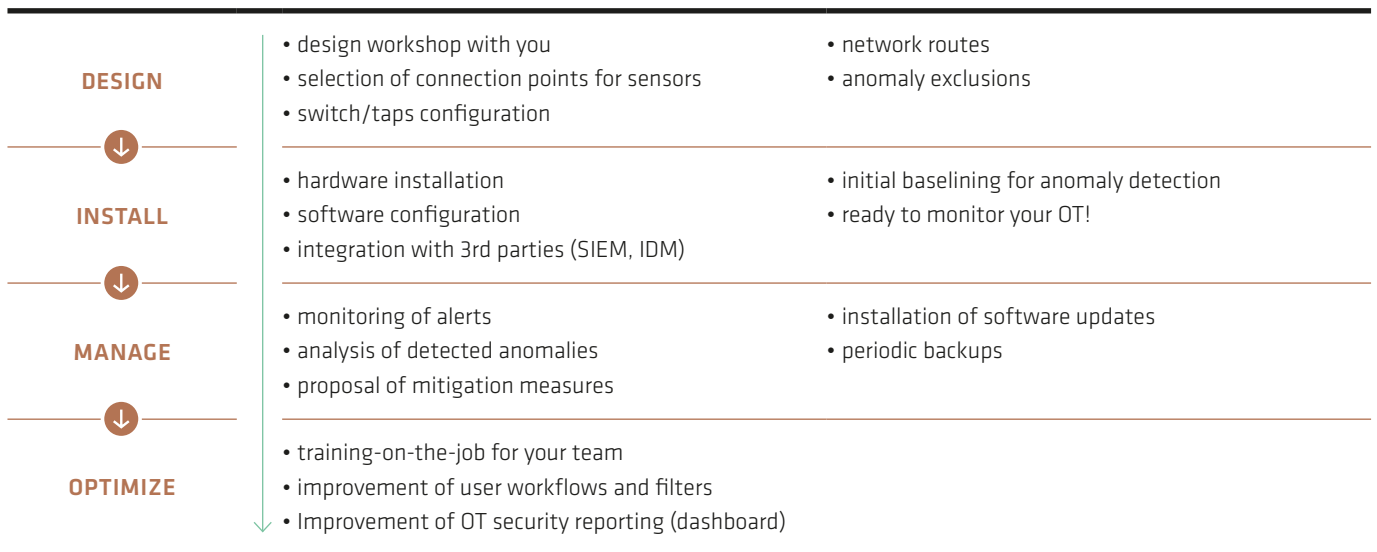

**ACCESS TO OT INTELLIGENCE** for building your own OT security team through training-on-the-job

**PEACE OF MIND** because we monitor so you don't have to

# The recipe to peace of mind

## OT security support from start to continuous OT monitoring

## Managed OT Security Tailored To Your Needs

Rhebo Managed Protection is available in **three service agreement levels**, tailored to your needs. **You can choose between:**

SILVER	GOLD	PLATINUM
on-demand support for forensic analysis of critical OT anomalies	regular support for forensic analysis of OT anomalies	operation of Rhebo Industrial Protector by Rhebo as a managed service

## Keep Calm And Call Rhebo

### Rhebo OT Security Made Simple

Rhebo provides simple and effective cybersecurity solutions for Operational Technology and distributed industrial assets for the energy sector, critical infrastructure and manufacturing. The company supports customers with OT security from the initial risk analysis to managed OT monitoring with intrusion & anomaly detection. Since 2021, Rhebo is part of the Landis+Gyr AG, a leading global provider of integrated energy management

solutions for the energy industry with around 5,000 employees in over 30 countries worldwide. Rhebo is a partner of the Alliance for Cyber Security of the Federal Office for Information Security (BSI) as well as the Teletrust – IT Security Association Germany. The German company was awarded the »Cybersecurity Made In Europe« label for its strict data protection and data security policies. [www.rhebo.com](http://www.rhebo.com)
